

## GROUND WIRE GRIP CLIPS

Secure Any Small Single Conductor

### FEATURES

- Typically used to secure single antenna ground wire neatly and professionally
- Clip conforms to round surface without indenting
- Clip conforms to various diameters
- Almost 360° of grip prevents sliding of conductor
- UV resistant black (PE) Polyethylene plastic resin for long lifespan and security
- Clip can be removed and re-used

### DESCRIPTION

- These clips are attached to wood or similar surfaces with plated hex-head screws. The screw provides a little over 1/4" of penetration into the underlaying surface.
- Hex head screw uses 1/4" socket, # 2 Phillips or flat blade drive.
- Clips are designed to accommodate one antenna grounding wire, or one 'messenger' wire.
- Can be used to secure any small conductor neatly in place.

### PACKAGING

100 clips in each bag. Also available in black (GCGDBLK).
